

# CERES PLUTO'S MOTHER-IN-LAW

Wikimedia Commons

**CERES** Pluto's mother-in-law. Proserpina's mother. Dwarf planet number 1.

**GREEK EQUIVALENT** Demeter

**MYTH** Ceres lost her daughter Proserpina when Pluto fell in love with her and came up from Hades to abduct her. In her grief she neglected her role as Goddess of agriculture and the four seasons turned into endless winter. She appealed to Jupiter to bring about justice. Starving humanity

appealed too. Jupiter asked Proserpina if she had eaten any pomegranate seeds while with Pluto. She said she had eaten half of them, so Jupiter gave Ceres access to her daughter every spring and summer.

**MEANING** Ceres shows you where you have control and power, but must deal with loss by compromising – seasonally or regularly - so that others may be empowered.

*The Seasons*  
by Joseph Haydn (CD)

The Seasons, by Joseph Haydn, had its premiere in 1801, the year of Ceres' discovery. Roman writers tell us that when Proserpina was with Ceres, the latter's happiness delivered spring and summer. Jupiter's solution to the epic Pluto-Ceres power struggle was to dole out Proserpina's time seasonally, on a fair roster.

## CERES IN YOUR HOROSCOPE

**INTERPRETATION** Ceres by sign and house shows you where your passion lies. And your fair entitlement. But also where you will regularly have to let go of who or what is so precious. In doing so, you lend others power. Ceres shows where you must be taken ceres-ly (seriously). She is number one, but was ignored by astrology for years.

## INDIRA GANDHI CERES IN INDIA

Indira Gandhi was born on November 19th 1917 at 11.11.14pm in Allahabad, India (Solar Fire, A Rodden Rating). She was the first female Prime Minister of India. Her horoscope reveals Ceres 19 Scorpio, Aesculapia 19 Aries, Bacchus 19 Libra, Cupid 19 Leo and Uranus 19 Aquarius. Gandhi oversaw India's Green Revolution which transformed the country's agriculture – and the territorial dispute over Kashmir.

## ONE BOOK FOR ALL THE SIGNS IN 2013

# Your 2013 Horoscope

It's easy to understand why people feel so passionately possessive about their pregnancies, or their children! The world of younger people is where you will also need to work with your own needs and distinct episodes in your life will teach you acceptance. The issues may also involve relatives, stepchildren, godchildren. Or perhaps younger people en masse – the next generation. Relationships which might end in parenthood or step-parenting are also tied up here. You'll have to make seasonal adjustments in these intensely personal areas of your life. When it comes to the next generation, or relationships which might lead to an heir (or a dynasty) your life will be easier if you can compromise. Letting go is an art, but you can do it. And good times will *always* return.

## CERES IN SAGITTARIUS

There is something reliably cyclical about your life as a publisher, teacher, student, writer or traveller. Letting go and giving up are part of the deal. But perhaps the regular losses

make the gains seem sweeter. The art of happiness (or at least, making your peace with the universe) is to understand that nothing is yours, forever. You will always have to share and compromise in the world of books, education, academia and travel. It's where other people and organisations will always seek to take (and take over). It is also where you will feel most entitled. Justifiably so! You are the creator and 'feeder' for so many people in publishing, learning or travel. If you can count on the fact that what you lose will return, though, it should make the down times feel like an interesting contrast. Never a loss.

When Saturn is in Sagittarius from September 2015 to December 2017 there are important lessons to learn about this. Read more about Saturn on page XX of this e-book.
