

PLUTO IN CAPRICORN

Pluto Facts

Pluto was the ninth planet from the Sun but was reclassified in 2006.

Discovered in 1930, Pluto is a complex and mysterious world with mountains, valleys, plains, craters, and maybe glaciers.

Pluto is orbited by five known moons, the largest of which is Charon.

Pluto was named by an 11-year-old girl. In 1930, Venetia Burney of Oxford, England, suggested to her grandfather that the new discovery be named for the Roman god of the underworld. He forwarded the name to the Lowell Observatory and it was selected.

Rules Scorpio

In Esoteric Astrology Pluto rules Pisces

Pluto is the god of the Underworld in Roman mythology. His Greek counterpart was Hades.

Pluto chose never to sit on Olympus with the other gods and goddesses, preferring to remain in the Underworld.

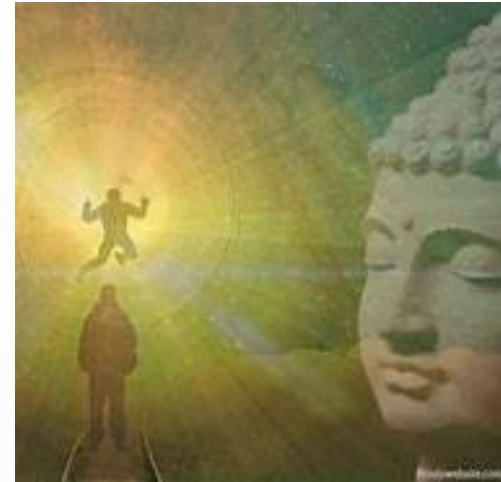

In Astrology, the energies of Pluto are transforming. Pluto represents subconscious forces, ruling all that is “below the surface”.

On the up side, Pluto is associated with renewal and rebirth. It represents endings and new beginnings, as well as spiritual growth and rebirth. Negative expression of Pluto is an obsessive desire for power and control and general destructiveness.

The position of Pluto by sign will be shared with other people in the same generation due to the comparatively slow movement of Pluto, the outermost planet, in the heavens.

By house, the position of Pluto shows where individuals search for truths and deeper meaning. This area of life may be associated with change, upheaval, power struggles, and issues of control.

10TH Sign of the Zodiac

EARTH

CARDINAL

Ruled by Saturn

Smart, hardworking, and fully in control of their destiny, a Capricorn will *always* get what they set their mind to, in both personal and professional life—no excuses. Capricorns may get a reputation as stubborn, but they simply know what they want, and also know how they wish other people would behave.

Natural rule-followers, Capricorns thrive on order and love strict rules, hierarchies, and set ways to do things.

Capricorns are great at climbing the corporate ladder, and especially adept at making (and investing) money. Capricorns put a lot of stock in traditions. One of the Capricorn's challenges can be to embrace its opposition Sign – Cancer. In other words feelings and the fact that life can be messy when loved ones are involved.

So how does Jupiter the planet of expansion work in Capricorn the Sign of constriction?

Renewal

Pluto in Aquarius

Transiting in and out of Aquarius since March 2023, Pluto finally enters Aquarius officially on November 24, 2024.

So what we are experiencing is a strange transition phase where the business of Pluto in Capricorn needs to be finalized before we experience the next level of Pluto in Aquarius.

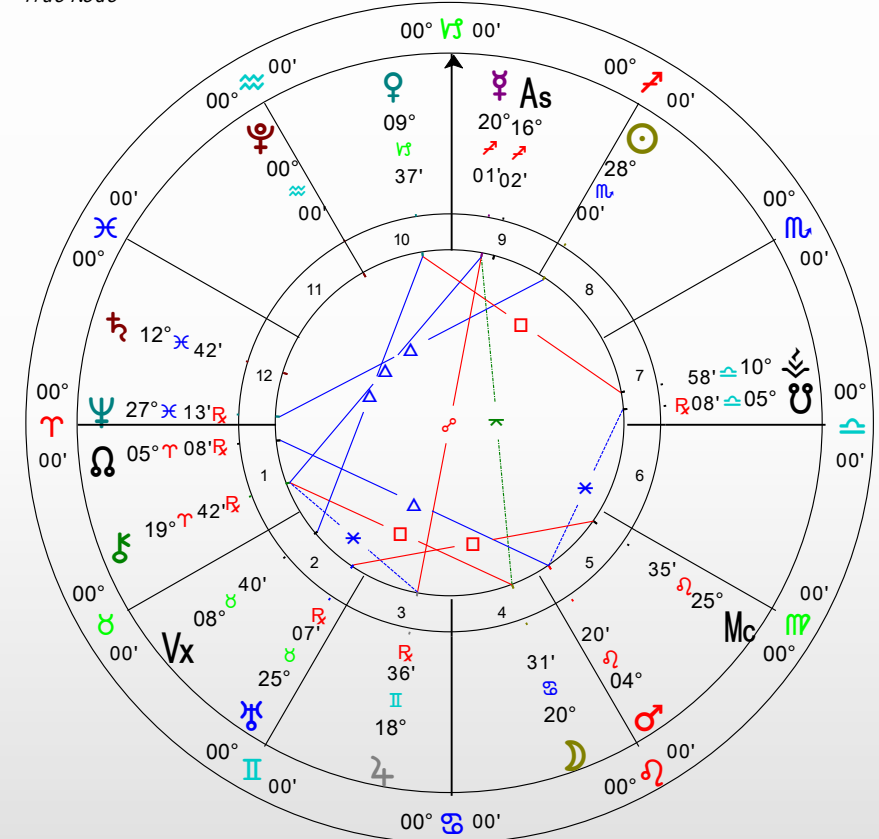

Pluto in Aquarius will be about cleaning up planet earth. Esoterically Aquarius is about service to humanity through cleaning the mess, the Hercules story of cleaning the stables.

What we are experiencing now, is the crumbling of the echelons of power that are the patriarchy. The misuse of power is what will topple into the underworld.

Power to the people.

Pluto will bring up anything from the past.

If you have Capricorn in your Birth Chart then you will know its effects as the past 15 years or so will have brought their challenges.

On a global scale we are dealing with the worlds resources. It's no coincidence that the pandemic occurred during this time. This was supposed to be a lesson about the world's resources.

Jupiter, Saturn and Pluto were challenging us to see the misuse of power, the way in which we should be treating each other and the world.

Mostly though as it's all about Capricorn goats, it's about power in the corporate and government fields. Those at the top of the mountain topple if they misuse power. These are the mountain goats.

Those domestic goats at the top of their family hierarchy will topple if they have tried to control others.

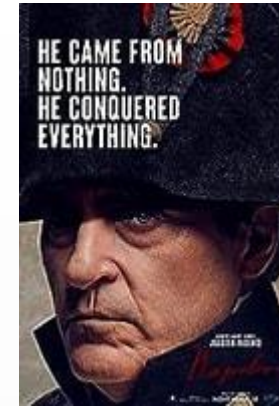

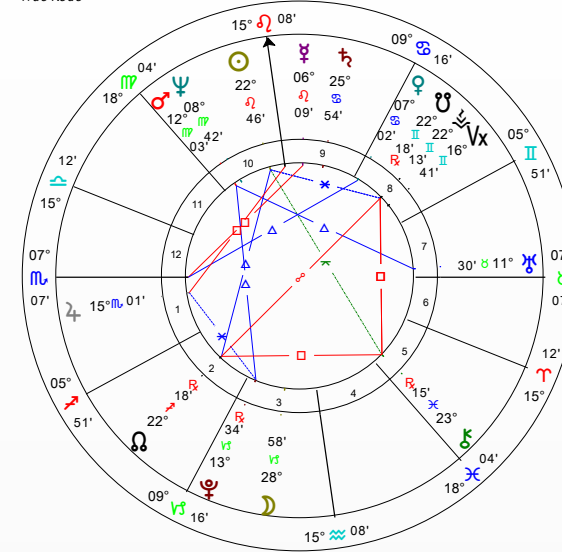

What to Expect during Pluto in Capricorn

Anyone with Capricorn personal points – Ascendant, Sun, Moon, Mercury, Venus and Mars will experience:

- Issues from the past coming back to be transmuted
- Issues of power – self or others to be resolved
- Issues of integrity to be assessed – past lack of integrity may surface
- Childhood issues (Moon and Mercury) resurfacing for resolution
- Relationship issues (Venus and Descendant) coming to light for resolution

Silicon Valley entrepreneur and billionaire Elon Musk runs the only private entity to put a capsule in space and bring it back to Earth. He has an electric car company many think is the future of the auto industry and a homerun for the environment. But this risk-taking idealist went through a trying time he calls the worst year of his life in 2008 when those companies were nearly dead and he was broke and in debt.

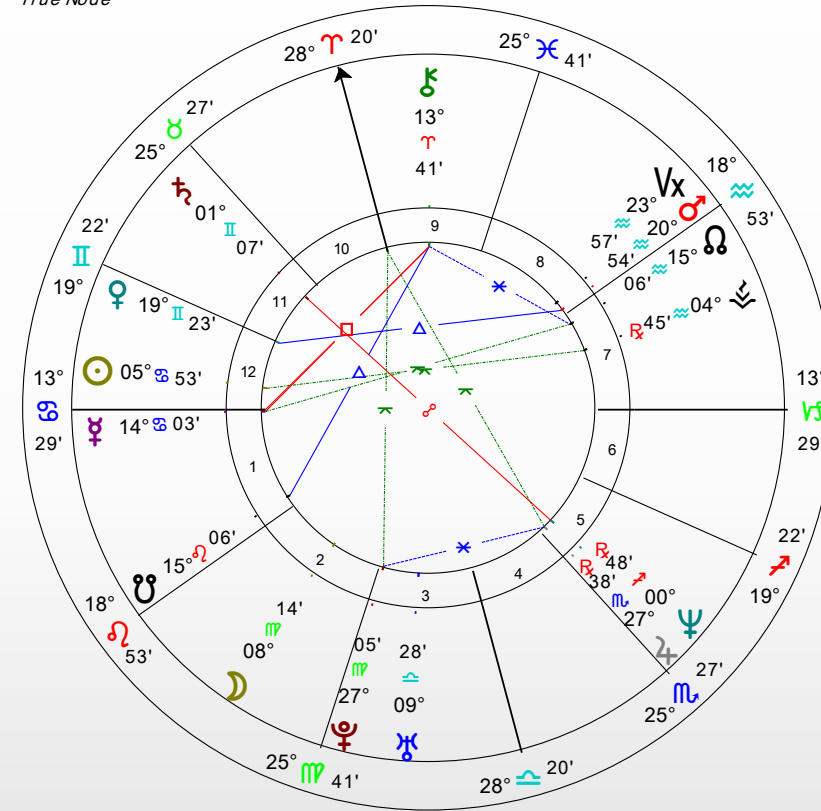

2015: OpenAI

Musk co-founded OpenAI as a non-profit in 2015, with a for-profit artificial intelligence research lab component; it was started with a \$1 billion collective pledge from its founders. Musk has been open about his interest in developing “friendly” AI that supports humanity, but he ended up resigning from the board in 2018 due to conflicts with Tesla’s AI projects.

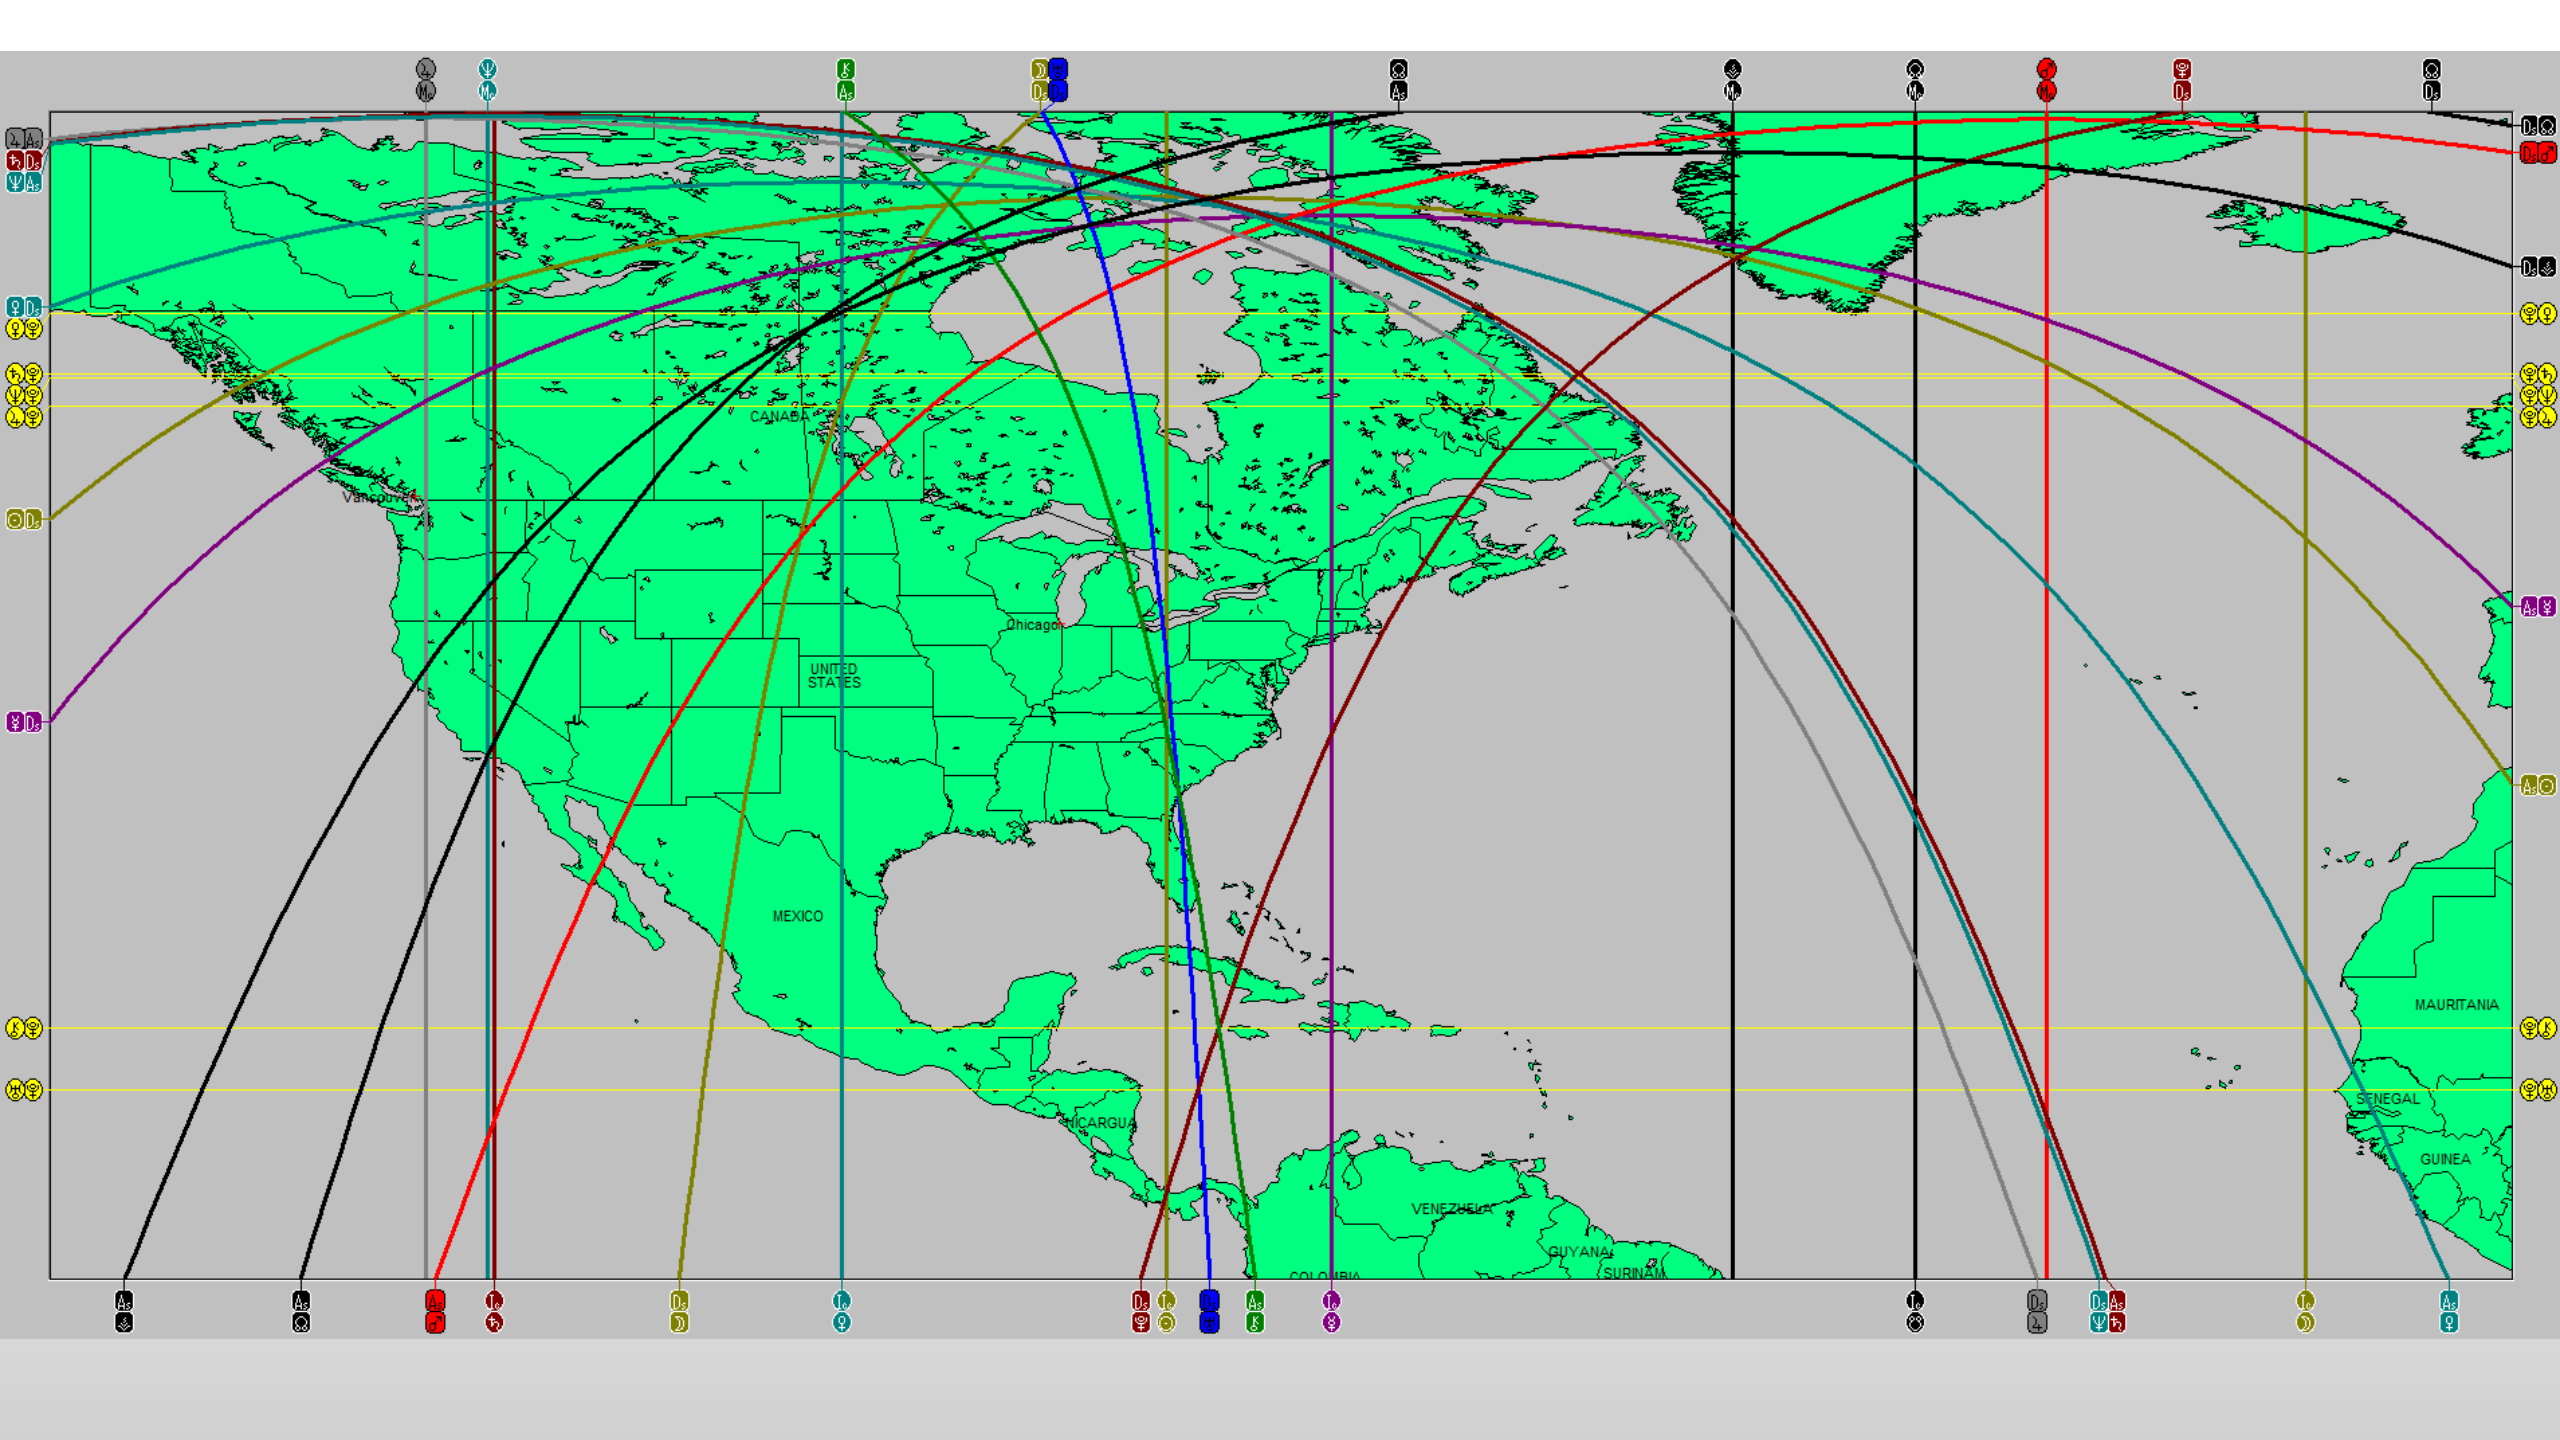

Musk remarried in 2013. On New Year's Eve 2014, Musk filed for a [second divorce petition](#) that he withdrew seven months later. In 2016, Riley filed for divorce from Musk, and the divorce was finalized later that year.

Capricorns are most likely to be affected personally.

Other Zodiac Signs experience Pluto in different areas of life.

It's important to remember that transiting Pluto brings up issues from the past. So if you have acted with integrity then the effects are hopefully less dramatic. For instance, if you are a Leo and are young, or older and have looked after your health then your health is less likely to be a big issue.
