People naturally ask which asteroids are pertinent to one's chart. Which should we use? there are so many of them! Good advice from Jessica Adams is to look mainly at the members of the olympian family - with their Roman names - within the astrological chart structure, and their offspring.

International astrologer, Jessica Adams is the author of *Your Birthday* (Hachette) and the astrological consultant on *The Aries Billionaire* (Audible UK). She also hosts *The Astrology Show* podcast.

Key Astrological Events

The New Moon in Aries - March 29th

The March 2025 New Moon Eclipse takes place with the Moon at 9° Aries with the Sun also at 9° Aries, on Saturday 29th March 2025, occurring at 3:58am in Los Angeles.

But - this is a New Moon and a new beginning you may want to avoid.

Mercury Retrograde - April 17th to 26th

Mercury goes backwards and forwards over Aries at 0-9 degrees.

We can expect to see strike action, computer issues, internet chaos, extreme weather and more. This is an extremely risky period for world peace as Neptune also enters Aries, ruled by Mars god of war. This is a rare and historic transit and any country trying to negotiate now will pay the price later.
