People naturally ask which asteroids are pertinent to one's chart. Which should we use? there are so many of them! Good advice from Jessica Adams is to look mainly at the members of the olmpyian family - with their Roman names - within the astrological chart structure, and their offspring.

International astrologer, Jessica Adams is the author of *Your Birthday* (Hachette) and the astrological consultant on *The Aries Billionaire* (Audible UK). She also hosts *The Astrology Show* podcast.
